

SLOT MACHINE

VIDEOCART™

22

Z

On Your Mark

Here is a game of chance. Start the wheels a'turning and see what comes up.

Get Set

Insert the cartridge into your unit with the edge label toward you and the top label facing up. Press reset button.

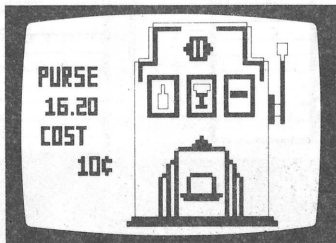

Go

Select button #1 or button #2

Game

Button #1—the slot machine will run and each wheel will randomly stop

Button #2—the player must stop each of the three wheels by pushing down on the hand controller. Each wheel will stop from left to right. Three successive pushes are required to stop the wheels and to see the outcome.

How To Use The Hand Controller

The purse must be selected before the cost (bet). To select the size of the purse, move the hand controller to the desired quadrant by holding the hand controller with the indicator pointing away from you and representing 12 o'clock on an imaginary clock face.

12 o'clock—decreases purse in \$10.00 increments

3 o'clock—increases purse in \$1.00 increments

6 o'clock—increases purse in \$10.00 increments

9 o'clock—decreases purse in \$1.00 increments

Pushing down on the hand controller locks the purse.

Now for the cost (bet) selection, the same procedure as the purse selection is used. This time, however, the imaginary clock face times represent:

12 o'clock—50¢ (bet)

3 o'clock—5¢

6 o'clock—25¢

9 o'clock—10¢

Pushing down on the hand controller locks the cost.

When you push down on the hand controller to lock the cost, the wheels are automatically set in motion. If button #1 was selected the wheels will stop randomly to indicate a win or a loss. If button #2 was selected you must stop the wheels with three successive pushes on the hand controller to get the results.

Your winnings or your losses will be automatically added or subtracted from your purse. Note: you may at any time, between rolls, change the size of your cost (bet).

The Pay Off

It is tough to win at Big Al's Casino if you don't know the odds. Big Al doesn't follow the other casinos pay off scheme. For example, Big Al is big on bottles, but not so big on bells. To win at Big Al's you first have to figure out the pay off on the different combinations then play for the best combination.

Have Fun
